Grip	Ridged lid and bottom for easy opening, even with gloves
Intended use	Specimen collection, storage and transportation
Product code	SLE/P/45
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a 120 ml PP Specimen Container Used For?

Laboratories use this container to receive samples, keep them closed during storage and send them on to another bench or laboratory. The graduations on three sides let staff read the approximate volume from any angle without turning the container round.

Label each container before filling, close the lid firmly and keep it upright during transport. Teaching labs also use such containers to hold collected biological or environmental samples for practical work, alongside other biology lab equipment. Follow your institution's rules for handling and disposing of clinical specimens.

What to Specify When Ordering

- The number of containers required.
- Whether this 120 ml container suits your samples, or a different type such as the Specimen Container, Universal 30ml or Specimen Container, Metal Cap.
- Whether sterile containers are needed; this listing does not state sterility, so ask us.
- The delivery location in India or abroad.
