Product Name :

Stirring Rod, Glass

Product Code :

SLE/CH/229

Description :

Stirring Rod, Glass (Product Code: SLE/CH/229) is a clear, 30cm glass rod for mixing solutions, dissolving solids and guiding liquids during transfer in chemistry practicals. Its 7mm diameter gives a sturdy feel in the hand for everyday bench work, and the glass is both heat resistant and chemical resistant. The rod is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and belongs to its range of glass chemistry lab equipment in India for schools, colleges and teaching laboratories abroad.

Specifications

Parameter	Detail
Material	Glass
Function	Stirring; dual purpose
Diameter	7mm
Length	30cm
Colour	Clear
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant

Typical Use

Students reach for a glass stirring rod whenever a solid has to be dissolved, a precipitate broken up or a mixture kept uniform — preparing salt solutions, growing crystals, mixing reagents before a titration or stirring during a neutralisation. The 30cm length reaches the bottom of tall beakers and measuring cylinders while keeping fingers clear of the liquid. The same rod doubles as a pouring guide: held against the lip of a beaker, it lets a liquid run down its surface into a funnel without splashing, which is the standard technique taught for filtration and decanting. A drop taken on the tip can also be touched onto indicator paper to check pH.

Stir with a gentle circular motion rather than striking the walls of the vessel, which protects both the rod and the beaker from chipping. Rinse the rod with distilled water between reagents so one solution does not contaminate the next, and lay a hot rod on a clean, dry surface to cool instead of plunging it into cold water. These simple habits keep the rod in service for many terms and are worth building into any school chemistry lab equipment routine.

Manufacturer

This glass stirring rod is produced by **Jain Scientific Equipments Private Limited**, better known to schools and colleges by its trading name, ScienceLab. From its base in Ambala, Haryana, the company makes and supplies apparatus for teaching laboratories, from basic glassware to complete practical setups. Background on the company is available on our company profile page.
