Description :

Crocodile Clip (Product Code: SLE/PHY/149) is a standard-size spring clip used to make quick, temporary connections to wires, terminals and component legs in school and college electricity labs. Each nickel-plated steel clip is 50 mm long and rated at 10 A, with a 4 mm socket at the rear and a screw connection that can also be soldered; clips come in packs of 100. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Size	Standard
Material	Nickel-plated steel
Length	50 mm
Current rating	10 A
Rear connection	4 mm socket
Wire connection	Screw connection; can also be soldered
Pack	100 clips
Product code	SLE/PHY/149
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Crocodile Clip Used For?

Pushing a 4 mm plug lead into the rear socket turns any lead into a clip-on lead, so students can grip a resistor leg, an electrode, a lamp terminal or a bare wire without tools. Alternatively, a wire can be clamped under the screw or soldered on to make custom test leads, battery connectors or jumper wires for a class set.

A pack of 100 is sized for school lab equipment bulk supply, equipping several benches or replacing clips lost over a term. The 10 A rating comfortably covers low-voltage student circuits; keep the jaws clean for good contact, check that screws are tight, and never use these open clips on mains wiring.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, supplies these crocodile clips from Ambala, Haryana, together with the leads and wire used to make up connections. Schools, colleges, dealers and importers in India and international markets can include them in a single order with other electricity accessories. Visit the ScienceLab profile page for company information.
