Description :

Digital Timer (Product Code: SLE/PHY/157) is a large digital countdown timer used to time set intervals of up to 99 minutes 59 seconds in school laboratories, classrooms and practical examinations. Its 64 x 38 mm LCD is easy to read from across a bench, and it comes with a stand, clip and magnetic fixing so it can be placed wherever the class can see it. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Large digital countdown timer (countdown only)
Range	Up to 99 minutes 59 seconds
Resolution	1 second
Display	LCD, 64 x 38 mm
Overall size	80 x 70 x 20 mm
Mounting	Stand, clip and magnetic fixing included
Product code	SLE/PHY/157
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Digital Countdown Timer Used For?

A countdown timer takes the clock-watching out of practical work. Teachers set it for heating or cooling periods in thermal experiments, for fixed reaction, soaking or drying times in chemistry and biology, and for the time allowed in a practical assessment. The magnetic fixing lets it sit on a whiteboard or steel cabinet, the clip holds it on a folder or stand rod, and the stand keeps it upright on the bench.

Choose it for intervals rather than for timing fast events: it counts down only, in 1 second steps. For pendulum periods, reaction times or other elapsed-time readings, a stop clock or electronic timer is the better tool. Many labs keep one countdown timer per bench as part of their everyday physics lab instruments.

Supplier

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, supplies the Digital Timer from Ambala, Haryana, India. Schools and colleges often add timers to a larger order of physics, chemistry and biology apparatus, and the company can include them in the same quotation so one enquiry covers the whole list. Buyers across India and international markets are served. Company background is on our company profile.
