Description :

The **Human Embryo Development Set** (Product Code: SLE/BL/51) is a series of models showing the fetus at different stages of the gestation period, from each of the first three months of pregnancy through to the fourth and fifth month, together with models of a breech presentation, a fetus lying on its back and twin five-month-old fetuses in the uterus. Each model is mounted on a base, coloured and numbered with a key card. It is produced by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an anatomical models manufacturer in Ambala, for biology departments, nursing and midwifery schools and medical colleges.

Specifications

Parameter	Detail
Type	Set of fetal development models covering the gestation period
Models 1–3	One model for each of the first three months of pregnancy
Model 4	Fetus in the fourth to fifth month
Model 5	Fetus in the breech position
Model 6	Fetus lying on its back
Model 7	Twin five-month-old fetuses in the uterus
Closer examination	Models 4–8 are described as allowing closer examination of the anatomical features that have developed
Mounting	Mounted on a base
Finish and identification	Appropriately coloured, numbered, with key card

Typical Use

The set is laid out in order on the bench so students can walk along a timeline of pregnancy. The first three models show how quickly the embryo changes month by month early on; the fourth shows the more developed fetus of the fourth to fifth month. The remaining models move the discussion from growth to position: the breech model and the fetus on its back let tutors explain fetal presentation and why it matters as delivery approaches, while the twin model shows how two fetuses share the space of the uterus.

This makes the set especially useful in midwifery and obstetric nursing training, as well as in senior-school reproduction chapters. As part of a biology lab setup in schools in India, it is often shared between sections and kept in a closed cabinet; keep the key card with the set, dust the models with a soft brush and return each one to its place in the sequence after class.

Manufacturer

ScienceLab is the brand under which Jain Scientific Equipments Private Limited, based in Ambala, Haryana, makes and sells this development set and its other human anatomy teaching mode
