Description :

Solar Sunstick (Product Code: SLE/PHY/224) is a learning toy used to introduce children from 6 years of age to solar energy through play. It combines two renewable resources, solar energyand wood, so young learners can discover several natural phenomena while their imaginationand creativity are encouraged. As a simple STEM learning aid for early science lessons, it is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Product type	Solar energy learning toy for children
Recommended age	From 6 years
Resources combined	Solar energy and wood, two regenerative resources, for an ecologically aware playing environment
Learning goals	Building knowledge of solar technology; discovering and understanding several natural phenomena; encouraging imagination and creativity
Play value	A variety of uses designed to keep children stimulated and interested
Product code	SLE/PHY/224
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Solar Sunstick Used For?

The Solar Sunstick is used to give young children an early, practical feel for solar energy. Rather than starting with diagrams, pupils play with an object that depends on the sun, which leads naturally to questions about where energy comes from, why sunlight matters and how natural phenomena around them work.

Teachers and parents can use it to open conversations about renewable resources, since the toy itself pairs solar energy with wood. Because it relies on solar energy, plan activities for a bright day or a well-lit window, and keep younger children supervised during play as with any learning toy.

Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, manufactures the Solar Sunstick alongside its wider range of school science and renewable-energy teaching aids. The toy is manufactured by the company, which lets pre-primary and primary buyers add it to orders for classroom apparatus.
