Description :

The **Human Female Genital Organs Model** (Product Code: SLE/BL/54) is a dissected model showing both the internal and the external female genital organs, with 40 positions marked for identification. It is made of advanced PVC and mounted on a stand. Manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it serves as reproductive-system biology lab equipment in India for senior school classes, nursing and midwifery programmes, and medical and paramedical colleges.

Specifications

Parameter	Detail
Type	Dissected female genital organs model
Coverage	Internal and external female genital organs
Positions shown	40
Material	Advanced PVC
Mounting	Mounted on a stand

Typical Use

Because it shows the external and internal organs in one dissected view, the model lets a tutor move from the outer anatomy inward in a single, continuous explanation, rather than switching between separate diagrams. With 40 positions to work through, it supports both an introductory overview for school students and the more detailed identification expected in nursing, midwifery and medical anatomy practicals. Typical topics include the structure of the reproductive tract, the menstrual cycle, fertilisation and the anatomical basis of common gynaecological examinations.

It works well in small-group sessions where students take turns naming the numbered positions, and it is also a sensible, matter-of-fact aid for reproductive health education. Keep the model on its stand when not in use, wipe it with a damp cloth and mild detergent, and avoid alcohol-based cleaners that can dull painted PVC surfaces.

Manufacturer

This model is made by Jain Scientific Equipments Private Limited in Ambala, Haryana, the company that trades as ScienceLab. It is a registered MSME enterprise with manufacturing as its major activity (Udyam UDYAM-HR-01-0003714), and its export consignments are handled under Importer-Exporter Code AAECJ8618A issued by the DGFT. Further details are on our company profile.
