Description :

Investigating Heat Poster (Product Code: SLE/PHY/270) is a laminated wall poster used to explain the key concepts of heat in school physics and general science classrooms. It gives teachers and students an illustrated view of heat sources, the transfer of heat energy, heat absorption and the expansion and contraction of matter, making it a natural companion to a heat energy science kit. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Type	Educational wall poster giving a graphic depiction of key heat concepts
Finish	Laminated
Topics illustrated	Sources of heat; transfer of heat energy; heat absorption; expansion and contraction of matter; further related heat concepts
Product code	SLE/PHY/270
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Investigating Heat Poster Used For?

Teachers use the poster as a visual anchor when they introduce thermal physics. Before a practical, the illustrations of heat sources and heat transfer give the class a shared picture of what they are about to observe, and afterwards the same panels help students explain their results in their own words. The panel on expansion and contraction of matter can be linked to everyday examples students already know, such as a tight metal lid loosening under warm water.

Because it is laminated, the poster can be wiped clean and kept on display year after year in a busy laboratory or classroom. Mount it at eye level beside the bench where heat practicals take place, and point back to it during revision of radiation experiment kit work and heat-absorption comparisons.

Supplier

Jain Scientific Equipments Private Limited trades as ScienceLab and supplies the Investigating Heat Poster from Ambala, Haryana, India. The company sources the poster alongside the heat apparatus in its physics range, so a school can order the wall display together with the equipment used in the same lessons. Schools, colleges, dealers and importers can request it directly. See our company profile for more about ScienceLab.

Related Physics Lab Equipment

Apparatus that turns the poster’s topics into hands-on practicals:
