Description :

Human Head and Neck Model (Product Code: SLE/BL/60) is a median-section anatomy model used to show the internal organs of the head and neck in biology, nursing and health-science classrooms. Mounted on a base, coloured and numbered with a keycard, it lays out the brain, nose, mouth and pharynx, larynx and cervical vertebral column along one midline cut. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM human anatomical models manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Head and neck model, median section
Structures shown	Median section of brain; nose; mouth and pharynx; larynx; vertebral column of the neck
Finish	Appropriately coloured and numbered
Identification	Keycard
Mounting	On a base
Product code	SLE/BL/60
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Head and Neck Model Used For?

The pharynx is the crossroads where air and food share a passage, and this model makes that arrangement easy to explain. Teachers follow air from the nose through the pharynx to the larynx, then follow food from the mouth through the pharynx towards the oesophagus, discussing how swallowing protects the airway. The same section supports lessons on speech production, on the position of the brain above the nasal cavity, and on how the cervical vertebrae support the head.

Nursing, dental, speech-therapy and first-aid instructors use it to explain airway positioning, while school teachers use it for the respiratory and digestive chapters of the biology syllabus. Ask students to name each numbered structure from the keycard, then trace a breath and a swallow in turn. Kept alongside respiratory and skull models among a department's biology teaching aids in India, it can be reused across several topics.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the original equipment manufacturer (OEM) of this head and neck model. It is produced at the company's own licensed factory at Saha, Ambala, Haryana, India, so schools, nursing colleges, dealers and importers deal directly with the maker rather than a reseller.
