Product Name :

Worcester Circuit Board Kit

Product Code :

SLE/PHY/321

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Worcester Circuit Board Kit (Product Code: SLE/PHY/321) is a circuit-building kit based on the Worcester circuit board pattern, used to assemble and test simple electric circuits in school science and physics lessons. Teachers choose Worcester-style boards because pupils can layout a circuit on a baseboard and see every connection clearly, which suits first lessons on current electricity. The kit is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Type	Circuit-building kit, Worcester circuit board pattern
Kit contents	Please ask us for the current contents list with your quotation
Product code	SLE/PHY/321
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Worcester Circuit Board Kit Used For?

Worcester circuit boards let students build real circuits without soldering. Components are placed on a baseboard and linked together, so a class can move from a single cell and lamp to series and parallel arrangements, add switches, and compare how brightly lamps glow as the circuit changes. Because the layout on the board matches the circuit diagram, students learn to read and draw diagrams at the same time.

As an electricity experiment kit for school labs, the boards also support measurements with an ammeter and voltmeter, tests of conductors and insulators, and simple fault-finding tasks. Keep cells out of the kit when it is stored, check connections are clean before each lesson, and count components back in at the end of the period.

What to Specify When Ordering

- Ask for the current contents list and confirm it covers the experiments in your syllabus.
- Number of kits — for example one per student pair or group.
- Any meters or extra boards you want quoted alongside the kits.

OEM Manufacturer

Jain Scientific Equipments Private Limited, the company behind the ScienceLab brand, is the OEM for the Worcester Circuit Board Kit and its related Worcester circuit boards. The kits are made at the company's own licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala, which operates under Factory Licence AMB-ONLINE-CHD-J-414, and the company is incorporated under CIN U29309HR2020PTC087597. Schools, colleges, dealers and importers buy directly from the factory, and spare boards can be requested from us. Visit our company profil
