Description :

Folding Magnifier, Single (Product Code: SLE/PHY/323) is a 25mm diameter pocket lens that folds into a plastic case, used to examine small objects such as insects, leaves, seeds, rocks and print at close range in school science and field work. It has a single lens giving approximately x10 magnification, and the folding case protects the glass when it is carried in a pocket or kit bag. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Single lens pocket magnifier
Lens diameter	25mm
Magnification	x10 approx.
Case	Folding plastic case
Product code	SLE/PHY/323
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Folding Pocket Magnifier Used For?

A x10 hand lens is the first magnifying tool most students use. In biology it reveals leaf veins and hairs, flower parts and the legs and mouthparts of insects; in earth science it shows crystal faces and grains in rocks and soil; in physics it is a simple example of a converging lens. Because it folds shut and fits in a pocket, it goes on nature walks and field trips as easily as it sits on a lab bench.

For the sharpest view, hold the lens close to the eye and bring the object towards it until it comes into focus, rather than holding the lens at arm’s length. Good daylight or a desk lamp helps at this magnification. As a hand lens magnifier for school kits in India and abroad, it is easy to issue one per student and collect back at the end of a lesson.

Supplier

Jain Scientific Equipments Private Limited, which operates as ScienceLab from Ambala, Haryana, India, supplies the Folding Magnifier, Single to schools, colleges, science kit assemblers, dealers and importers. We source it for single classrooms and for large class-set quantities, and can pack it together with other biology and physics items in one shipment for India and international markets. Details about the company are on our company profile.

Related Physics Lab Equipment

Other magnifiers and observation aids to consider with the Folding Magnifier, Single:

- Magnifier, Folding — another folding magnifier option in the same range.
- Minibeast Magnifier — viewing pot with a magnifying lid for live creatures.
