Description :

Desk Pad (Product Code: SLE/SAH/32) is a low-maintenance desk covering, described in its product specification as antiviral and self-cleaning, used on shared desks and tables in schools, offices and reception areas. The material is embedded with silver particles, weighs 510 g/m², and comes as large 800 x 500 mm pads, two per pack, that can be cut to fit. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Desk mat touch-point covering, specified as antiviral (virucidal technology, per the product specification)
Active element	Embedded silver particles
Stated performance	The product specification states protection for users from up to 99.5% of viruses, including Covid 19
Fitting	Can be adhered to almost any surface; can be cut to fit any shape or size
Material weight	510 g/m² (lightweight)
Fire classification	M1 (as given in the product specification)
Dimensions	800 mm x 500 mm
Size	Large
Pack	Pack of 2
Product code	SLE/SAH/32
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Desk Pad Used For?

Desks in computer rooms, libraries, exam halls and staff rooms are touched by many people each day. The Desk Pad is fixed over the writing area so that the part people actually lean on and handle is covered by it; according to its product specification, the surface is antiviral and the embedded silver particles act on viruses soon after it is touched. It is presented as a robust alternative to repeated antiviral spraying of the same desk.

For a neat fit, clean and dry the desk first, lay the pad in position, trim any overhang with sharp scissors, and then press it down firmly. The pad still needs ordinary dusting and wiping of spills, and the rest of the desk should stay in the normal cleaning routine. Schools looking for educational laboratory equipment in India can add these pads to shared benches in computer and project rooms at the same time.
