Description :

Treble Trolley with Shallow and Deep Trays (Product Code: SLE/HF/34) is a treble width mobile store that pairs a large bank of shallow trays with a smaller set of deep trays, all on runners. It is designed to act as a central, wheeled equipment store for a busy science department, holding both the many small items and the few bulky ones a week of practicals demands. Manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it is a useful piece of laboratory furniture in India for schools and colleges running several practical classes a day.

Specifications

Parameter	Detail
Type	Treble width storage trolley
Trays supplied	16 shallow and 4 deep trays
Runners supplied	20 pairs
Castors	Larger castors with brakes, for added stability
Storage space	33% more than ScienceLab standard trolleys
Intended use	Transporting class science equipment between classroom and prep room

Typical Use

With twenty trays in total, many departments give each teaching group or class section its own labelled shallow trays and reserve the four deep trays for items everyone shares, such as a demonstration power supply, a set of stands or a box of glassware. A technician can build the whole week's practical kit on one trolley and simply wheel it to whichever lab is timetabled.

The shallow trays are ideal for inventory checks after a lesson: a quick look along the rows shows whether every magnet, lens or component set has come back. Before moving the trolley, close all trays fully, release the brakes on the larger castors, and re-apply them as soon as the trolley is in position.

Manufacturer

The ScienceLab brand belongs to Jain Scientific Equipments Private Limited in Ambala, Haryana, which manufactures teaching apparatus together with trolleys, frames and storage units for laboratories. You can learn about the company on our company profile page.
