Product Name :

Bench Height Trolley, Treble Column

Product Code :

SLE/HF/40

Description :

Bench Height Trolley, Treble Column (Product Code: SLE/HF/40) is a wide, three-column trolley measuring 1055mm across and 850mm high, supplied with castors and ready to be fitted with the trays and runners of your choice. It gives a laboratory a long run of low, mobile tray storage that can stand in line with benches or serve as a movable equipment station. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for school and college science departments, hospital labs and anyone planning school laboratory furniture around modular tray storage.

Specifications

Parameter	Detail
Type	Bench height trolley, treble column
Height	850mm
Width	1055mm
Depth	420mm
Mobility	Supplied with castors
Trays and runners	Sold separately

Typical Use

With three columns side by side, many labs dedicate one column to each of physics, chemistry and biology, or one to each class that shares the room. Because the trolley stays at bench height, a teacher can stand beside it and reach every tray, which makes it well suited to issuing and collecting kit at the start and end of a practical. In a hospital or college lab it can act as a mobile stock point for consumables that several workstations draw on.

Plan the tray mix before ordering — shallow trays for many small items, deep trays for fewer tall ones — and order runners to match. Given its 1055mm width, check doorways and the route between rooms, load the trays evenly across all three columns, and push the trolley from its long side.

Manufacturer

This treble column unit is made in Ambala, Haryana by Jain Scientific Equipments Private Limited, which sells its products under the ScienceLab name to schools, colleges and hospitals. Learn more on our company profile.
