Description :

Metal Top, Double Frame (Product Code: SLE/HF/42) is a metal top panel, 710mm wide and 420mm deep, made to finish the top of a double frame in ScienceLab's modular tray storage range. Adding a top turns the open upper end of the frame into a flat surface where trays, a boxof kit or a register can be rested while tray contents are checked. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as one of the lab equipment accessories buyers add when completing tray storage for a school, college or hospital laboratory.

Specifications

Parameter	Detail
Type	Metal top for double frame
Material	Metal
Width	710mm
Depth	420mm
Supplied as	Top panel only – frame ordered separately

Typical Use

Technicians use the top of a storage frame as a temporary landing spot: a tray lifted out of the frame can be set down on the metal top while its contents are counted or topped up, and returned without walking to a bench. A closed top also stops small items or dust dropping into the upper trays from above, and gives the storage unit a neater, finished look in a prep room or corridor.

Wipe the top with a damp cloth and mild detergent, avoid standing hot items or open chemical containers on it, and do not overload it with heavy equipment. If you are refitting existing frames, measure them before ordering and share the dimensions with us so we can confirm the top suits your units.

Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited, based in Ambala, Haryana, which makes this metal top together with the frames, trolleys and trays it belongs with. Our company profile gives more background.
