Description :

Double Column Trolley (Product Code: SLE/HF/59) is a mobile tray storage unit with two side-by-side columns that holds up to 12 shallow trays and rolls them wherever work is being done. Wards, clinics, science departments and stores use it to keep dressings, instruments, samples or student materials sorted in trays that can be pulled out and carried to the bench. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)** in Ambala, India, as part of a wider range of laboratory furniture India buyers rely on for hospitals, colleges and schools.

Specifications

Parameter	Detail
Type	Double column trolley for trays
Capacity	12 shallow trays
Dimensions	710 x 420 x 850mm
Top	Recessed and removable, with open corners for easy cleaning
Castors	Heavy duty 75mm castors fitted into solid steel blocks for extra strength

Typical Use

In a hospital ward or treatment room the trolley works as a rolling organiser: each tray can hold one category of supplies, so staff can wheel the unit to a bedside or procedure area and lift out only the tray they need. The recessed top gives a small working surface that stops items rolling off during movement, and because it lifts off and has open corners, spills and dust do not get trapped in the angles when the trolley is wiped down.

Schools and teaching labs use the same layout to keep practical kits ready for each class, which makes it a practical piece for any school lab setup India institutions are planning. A simple routine helps: label the tray fronts, load heavier items in the lower positions to keep the centre of gravity low, and push the trolley rather than pulling it over thresholds so the castors roll smoothly.

Manufacturer

This trolley comes from Jain Scientific Equipments Private Limited, the Ambala, Haryana company that trades as ScienceLab and produces hospital furniture alongside educational and laboratory equipment. You can read about the company, its facilities and its product range on the company profile page.
