Product Name :

Apron, PVC

Product Code :

SLE/SLC/13

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Apron, PVC (Product Code: SLE/SLC/13) is a heavy duty black PVC apron used to protect clothing during wet and messy work at lab sinks, in preparation rooms and in wash-up areas. Its detachable straps let the apron body be wiped or washed on its own and refitted for a different wearer, which suits shared aprons in busy school and college labs. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a laboratory equipment supplier in India.

Key Details

Parameter	Detail
Material	PVC
Colour	Black
Construction	Heavy duty
Straps	Detachable
Product code	SLE/SLC/13
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the PVC Apron Used For?

PVC aprons are chosen for jobs where clothing would otherwise get soaked: washing glassware, preparing and diluting solutions, handling specimens stored in liquid, and cleaning up spills. The smooth PVC surface does not absorb water, so it can be rinsed and put back on the hook for the next user.

Lab assistants and preparation-room staff tend to wear a PVC apron for most of the day, so a heavy duty build matters more than light weight. Take the straps off when they need a wash, and check the apron regularly for splits. Schools buying from a school lab equipment supplier in India can add a PVC apron for every sink station.

Supplier

The Apron, PVC is supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, to schools, colleges, laboratories, workshops and dealers in India and international markets. We source it for our Safety Lab Coat range. For vendor registration, the supplying company is Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597, GSTIN 06AAECJ8618A1ZT).
