Description :

Mop Bucket with Strainer (Product Code: SLE/HE/18) is a green plastic bucket fitted with a strainer, used to hold cleaning solution and press excess water out of a mop during floor cleaning in wards, labs, kitchens and corridors. It holds approximately 11 litres, is light enough to carryfrom room to room, and is described as chemical resistant and suitable for socket mops. It issupplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a labconsumables supplier in India.

Specifications

Parameter	Detail
Capacity	Approx. 11 litres
Material	Plastic
Colour	Green
Chemical resistance	Chemical resistant
Strainer	Included, for wringing the mop
Mop compatibility	Suitable for socket mops
Handling	Lightweight design, easy to carry and transport
Product code	SLE/HE/18
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Mop Bucket with Strainer Used For?

Fill the bucket with water and detergent or disinfectant, dip the mop, then press it against the strainer to squeeze out surplus liquid before mopping. A well-wrung mop leaves a thin film that dries quickly, so floors are not flooded and slip risk in wards, laboratories and corridors stays low. The 11 litre size is practical for a single room or corridor section before the solution needs changing.

Many facilities assign bucket colours to cleaning zones; check that green matches the zone you intend it for under your own scheme. Even with a chemical-resistant body, follow the dilution instructions of the cleaning chemical, empty the bucket after each round, rinse it and let it dry upside down so no dirty water stands overnight.

What to Specify When Ordering

- The number of buckets, for example one per cleaning zone or trolley
- The type of mop you use, since the bucket is listed for socket mops
- Whether handles and mop heads should be quoted at the same time
