## Description :

**O.T. Table Remote Control** (Product Code: SLE/LE/001) is an electro-manual operating theatre table whose powered movements are controlled from an LED-backlit hand remote, used to position patients during procedures in hospital operating rooms. Its five-section top is C-arm andX-ray compatible, with a large translucent sliding top for laparoscopy and C-arm work without reversing the patient. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its hospital furniture range.

### Specifications

| Parameter | Detail |
|---|---|
| Drive | Electro-manual drives with noiseless, jerk-less and smoothpositioning; powered movements activated by linear actuators |
