Description :

Complete Dissections (Product Code: SCL129/1.13) is a dissection kit for students that brings together the basic surgical instruments needed for laboratory experiments — scissors, tweezers,a scalpel, a needle and a pointer — in stainless steel with a mirror finish, packed in a leather kit. It gives each student or pair a personal, organised set for plant and animal dissection practicals in schools, colleges and training labs. Offered as a dissection kit for school use in India and abroad, it is made by a scientific instruments manufacturer in India, **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Student dissection kit with basic surgical instruments
Material	Stainless steel
Finish	Mirror
Packing	Leather kit

Kit contents:

- 1 large scissor
- 1 small scissor
- 2 tweezers (1 large, 1 small)
- Scalpel
- Needle
- Pointer

Typical Use

In a typical practical, students use the scalpel for the first incision, the large scissor to open body walls or cut stems, and the small scissor for fine trimming. The large tweezer lifts and holds back tissue while the small one picks out delicate parts such as stamens, ovules or blood vessels. The needle teases fibres apart and the pointer is used to show structures to the teacher or partner without touching them with fingers. This sequence suits flower, seed, earthworm and fish dissections found in a dissection set for biology in India.

Teach students to pass sharp instruments handle-first and to cut away from their hands. After each session, rinse the instruments, dry them thoroughly so the mirror finish stays bright, and return each piece to its place in the leather kit so missing items are easy to spot during a stock check.

Manufacturer

The kit is manufactured by **Jain Scientific Equipments Private Limited**, which trades as ScienceLab from Ambala, Haryana. The company is a registered MSME (Udyam UDYAM-HR-01-0003714), and export orders are handled under its Importer-Exporter Code AAECJ8618A issued by th
