Description :

Container Holder (Product Code: SCL283/042) is a wooden test tube stand used to keep test tubes upright and in order during experiments, while results develop and before the tubes are washed. It has 12 holes in a brown wooden body, enough for a full row of comparison tests on one bench. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India, and is a practical test tube rack for school labs in India.

Specifications

Parameter	Detail
Type	Test tube holder (stand)
Material	Wood
Holding capacity	12 holes
Colour	Brown
Use	Holding test tubes
Product code	SCL283/042
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a Wooden Test Tube Rack Used For?

Many school practicals are really a line of test tubes compared side by side: food tests for starch, sugar and protein, indicator colours across acids and bases, or the effect of temperature on a reaction. A 12-hole rack lets a group set out every tube in a fixed order, label the positions, add reagents one tube at a time and read the results together at the end. It also gives a safe resting place for a tube that has just been warmed, since wood does not draw heat away the way metal does.

Wipe drips and spills from the wood straight away, especially acids and dyes, and let the rack dry fully after cleaning. Keep it on a level bench, and fill it from one end so it does not tip when only a few tubes are in place.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, a registered MSME manufacturer (Udyam UDYAM-HR-01-0003714) that produces this wooden rack as the OEM at its own licensed factory in Saha, Ambala, Haryana. Export shipments are handled under Importer-Exporter Code AAECJ8618A (DGFT), so overseas buyers can source it directly as well. See the company profile for more.
