Description :

Clock Glass (Product Code: SCL301/051) is a shallow, curved borosilicate glass dish used to cover beakers, evaporate small volumes of liquid and hold solids for weighing in school and college laboratories. Its 70 mm diameter and smooth, glazed finish give a clear view of whatever sits on it, which makes it a small but constant part of borosilicate laboratory glassware in India. The Clock Glass is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Also known as	Watch glass
Diameter	70 mm
Material	Borosilicate glass
Finish	Glazed and smooth
Clarity	Clear vision through the glass
Build	Durable
Product code	SCL301/051
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Clock Glass Used For?

A clock glass earns its place on the bench through small, frequent tasks. Placed over a beaker, it keeps dust out and stops spattering while a solution is warmed. A few drops of sea water or copper sulphate solution left on it show students the solid that remains once the water evaporates, and crystals forming on the curved surface can be watched through a hand lens.

It also works as a light weighing dish for powders on a balance and as a resting place for a wet stirring rod. The glazed borosilicate surface wipes clean easily; for heating, warm the glass gently over a water bath rather than in a direct flame, and let it cool before washing.

OEM Manufacturer

This Clock Glass is manufactured by ScienceLab, the trading name of Jain Scientific Equipments Private Limited, which acts as the OEM for the product. It is produced at the company's own licensed factory in Saha, Ambala, Haryana, and dispatched factory-direct to schools, colleges, institutions and dealers. Because enquiries reach the maker directly, customers replacing broken glassware or repeating an earlier order can simply ask us. Learn more on the ScienceLab profile page.
