Description :

Bee, Hind Leg (Product Code: SCL405/0102) is a prepared microscope slide of a bee's hind leg used to show how insects are adapted to collect and carry pollen, in school and college biology lessons. Teachers choose it for adaptation and pollination topics, and the coloured preparation is mounted on borosilicate glass. Among the prepared microscope slides offered for India and international markets, it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Specimen	Hind leg of a bee
Slide material	Borosilicate glass
Preparation	Coloured
Box	Plastic, white, rectangular
Dimensions (per listing)	25.4 mm x 76.2 mm (1 x 3 in)
Use	Laboratory
Product code	SCL405/0102
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Bee Hind Leg Slide Used For?

In worker honey bees the hind leg is a pollen-carrying tool, and this slide lets students look at it closely. The feature most teachers point out is the pollen basket, a smooth, slightly hollow area on the leg fringed by long curved hairs that hold a ball of packed pollen. Nearby, rows of stiff bristles act as a comb that brushes pollen from the body, and a joint between leg segments works as a press to push it into the basket.

Showing the leg segment by segment helps classes connect structure to function and supports discussion of why bees matter for crop pollination. Scan the whole leg at low power first, then raise the magnification over the bristle rows and the basket margin. A useful follow-up is to have students compare this highly specialised leg with the walking legs of another insect.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab in Ambala, Haryana, supplies this bee hind leg slide to educational buyers and distributors. Institutional buyers who need registration details can note the supplier's Importer-Exporter Code AAECJ8618A (DGFT) and GSTIN 06AAECJ8618A1ZT. See the ScienceLab profile for an overview of the company.
