Description :

Human Anatomical (Product Code: JL209/0125) is a PVC human bust with head used to teach how the body is organised, part by part, in school and college anatomy classrooms. Biology teachers choose it for its 85 cm size and removable parts, which can be lifted out and replaced during a lesson. It is one of the human anatomical models made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Model form	Bust with head and removable parts
Size	85 cm
Material	PVC
Colouring	Non-toxic dye
Construction	Mountable
Parts reference (as listed)	G138: G159 + G138: G156
Product code	JL209/0125
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Human Torso (Bust) Model Used For?

A bust-style model gives students a whole view of the head and trunk in one piece, so they can see where structures sit in relation to each other before studying single organs. With the Human Anatomical model on the front bench, a teacher can remove one part at a time, pass it round for identification, then ask a student to put it back in its correct place.

As one of the practical biology teaching aids for secondary and college classes, it also suits revision sessions and practical examinations where learners must name and position parts from memory. Keep the removable pieces in a labelled tray between classes so none go missing, and wipe the PVC surface with a soft damp cloth rather than solvents.

What to Specify When Ordering

- Number of Human Anatomical models required for your laboratory or classrooms.
- Whether you want the parts set confirmed against the listed references G138: G159 + G138: G156.
- How you plan to mount or display the 85 cm bust, so packing can suit it.
- Delivery location in India or overseas for the freight part of the quote.
