Description :

The Liver Model with the Spleen bile the Pancreas and Duodenum (Product Code: SCL263/0152) is a magnified PVC anatomical model used to show the liver together with the spleen, the bile pathway, the pancreas and the duodenum in biology and health-scienceteaching. By presenting these upper abdominal organs as one group, it helps studentsunderstand how bile and pancreatic juice reach the small intestine. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Organs shown (as named)	Liver, spleen, bile pathway, pancreas, duodenum
Construction	3-dimensional PVC moulding
Colouring	Non-toxic dye
Scale	Magnified
Product code	SCL263/0152
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Liver, Spleen, Pancreas and Duodenum Model Used For?

The liver produces bile, which is stored and then released into the duodenum along with digestive juice from the pancreas; the spleen, lying close by, belongs to the blood and lymphatic systems rather than to digestion. Seeing these organs together helps students understand why they are taught as neighbours, and why a problem in one, such as a blocked bile duct, can affect another.

The model is used in secondary biology for digestion and its accessory organs, in nursing and paramedical anatomy, and in first-year allied-health teaching as a quick visual reference. Because it is magnified, the small structures around the duodenum are easier to point out. It fits naturally into a collection of human anatomical models alongside a full digestive tract model.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM of this liver model. The company makes it at its own licensed factory at Saha, Ambala, Haryana, India, and sells it factory-direct to schools, nursing and medical colleges, dealers and importers, so buyers deal with the maker rather than an intermediary. Read about the company on the ScienceLab profile.
