Description :

Liver-Auxiliary Organ of the Digestive Tract (Product Code: SCL285/0163) is a laminated wall chart used to teach the liver's role as an accessory organ of digestion in biology classrooms and laboratories. Teachers building a biology chart set for school use the 70 cm x 100 cm wall-mounted sheet when a digestion unit moves from the gut itself to the glands that support it. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory instruments supplier in India, at its own factory in Ambala.

What Is the Liver Chart Used For?

The liver is the largest gland in the body, and in digestion its key job is to produce bile, which is stored in the gallbladder and released into the duodenum to emulsify fats. Teachers use the chart to connect this with the liver's other functions, such as storing glycogen, processing absorbed nutrients that arrive through the hepatic portal vein and breaking down toxins.

Put it up alongside a general digestive system chart so students see both the whole tract and the gland that serves it. It also gives senior students a clear reference when revising liver structure and function before practical exams.

OEM Manufacturer

This liver chart is made by ScienceLab, the trading name of Jain Scientific Equipments Private Limited, which is the OEM and produces it at its own licensed factory at Saha, Ambala, Haryana, India. The company is a registered MSME manufacturer (Udyam UDYAM-HR-01-0003714) and handles export shipments under Importer-Exporter Code AAECJ8618A (DGFT). Schools, colleges, dealers and importers therefore deal directly with the maker for quotations and repeat supplies. Read more on the ScienceLab company profile.
