Description :

Cell Reproduction - Mitosis (Product Code: SCL305/0173) is a laminated wall chart used to teach how a single cell divides into two genetically identical daughter cells, in school and college biology laboratories. Biology teachers display the 70 cm x 100 cm chart during cell-division units so the class can follow the stages together before examining real dividing cells. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Topic	Cell reproduction by mitosis
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Used in	Laboratories and classrooms
Product code	SCL305/0173
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Mitosis Chart Used For?

Mitosis is the division that lets organisms grow, replace worn-out cells and repair damaged tissue. Teachers use the chart when walking through interphase, prophase, metaphase, anaphase and telophase, followed by cytokinesis, explaining how chromosomes condense, line up at the cell's equator and are pulled to opposite poles.

The chart works well as the reference point in a practical: students study it first, then look for the same stages in an onion root-tip slide under the microscope. It sits comfortably with other cell biology equipment in the lab and pairs naturally with a meiosis chart when the class compares the two kinds of division.

OEM Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, is the original equipment manufacturer of the Cell Reproduction - Mitosis chart. It is produced at the company's own licensed factory at Saha, Ambala, Haryana, India, and supplied factory-direct to schools, colleges, dealers and importers. Because the maker handles enquiries itself, extra copies for new classrooms can be requested from the same source. See the ScienceLab company profile for more about the business.
