Description :

Plant Cell Structure 1 (Product Code: SCL316/0178) is a laminated wall chart used to teach the parts of a plant cell and what each organelle does, in biology laboratories and classrooms. Teachers of botany and cell biology use the 70 cm x 100 cm chart as a large reference while students draw and label their own diagrams, and it fits easily into a school's botany labequipment. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEMmanufacturer and laboratory equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Topic	Structure of the plant cell
Type	Wall-mounted chart
Finish	Laminated
Size	70 cm x 100 cm
Intended for	Laboratory and classroom use
Product code	SCL316/0178
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Plant Cell Structure Chart Used For?

Plant cells share many organelles with animal cells, such as the nucleus, mitochondria and cell membrane, but they also have a rigid cellulose cell wall, chloroplasts for photosynthesis and a large central vacuole. Teachers use the chart to point out these features and to explain how each one helps the plant grow, store water and make its own food.

A common practical is to peel a thin layer of onion epidermis or mount a moss leaf, stain it and compare what is visible under the microscope with the chart. Hanging it beside the matching animal cell chart turns a single lesson into a clear side-by-side comparison of the two cell types.

What to Specify When Ordering

- That you need the laminated wall chart Plant Cell Structure 1 (code SCL316/0178), not the separately listed three-dimensional Plant Cell Structure model.
- Whether the Animal Cell Structure 1 chart should be added to the same order for comparison lessons.
- How many copies you need — typically one for each biology laboratory or classroom wall.
- The delivery location, in India or abroad, so the quotation can include dispatch.
