## Description :

**Pollution of the Seas** (Product Code: SCL342/0191) is a laminated wall chart used to teach how oceans and coastal waters become polluted and what that does to marine life in school and college classrooms. Biology, geography and environmental studies teachers display the 70 cm x 100 cm chart in laboratories and classrooms during units on water pollution and marine ecosystems. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

## Specifications

| Parameter         | Detail                                                |
|-------------------|-------------------------------------------------------|
| Topic             | Marine (sea) pollution                                |
| Type              | Wall-mounted chart                                    |
| Finish            | Laminated                                             |
| Size              | 70 cm x 100 cm                                        |
| Application       | Laboratories and classrooms                           |
| Product code      | SCL342/0191                                           |
| Manufacturer      | Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM |
| Country of origin | India (made in Ambala, Haryana)                       |

## What Is the Sea Pollution Chart Used For?

Teachers use the Pollution of the Seas chart to walk a class through the main routes by which waste reaches the ocean: oil from tankers and offshore sites, plastic litter carried by rivers, untreated sewage, fertiliser runoff that feeds algal blooms, and industrial chemicals discharged along the coast.

It then supports discussion of the consequences — seabirds and turtles caught in debris, fish killed where oxygen runs low, and pollutants that build up along marine food chains until they reach people who eat seafood. Paired with simple water tests, the chart turns an abstract global issue into a topic students can investigate, and it works well within a biology chart set for schools.

## OEM Manufacturer

Jain Scientific Equipments Private Limited, known to customers as ScienceLab, is the original equipment manufacturer (OEM) of the Pollution of the Seas chart and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Schools, colleges, dealers and importers buy it directly from the factory, with no trading intermediary between the maker and the classroom.
