Description :

Plastic Washing Bottles (Trays) (Product Code: SCI-142/022) is a 500 ml chemical-resistant plastic wash bottle used to direct a controlled jet of distilled water or solvent onto glassware, precipitates and electrodes — basic chemistry lab equipment in India's school and college labs. Squeezing the body sprays liquid through a 90° bent nozzle that can be aimed at different angles, and a sealable screw-top stops solvents evaporating. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Capacity	500 ml
Material	Plastic, chemical resistant
Closure	Sealable screw-top that prevents solvents from evaporating
Nozzle	90° bend for multiple spray angles
Operation	Squeeze-and-spray
Product code	SCI-142/022
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 500 ml Washing Bottle Used For?

A wash bottle delivers liquid exactly where it is needed. Typical jobs include giving beakers and flasks a final rinse with distilled water after washing, rinsing the last traces of a precipitate from a beaker onto filter paper, bringing a volumetric flask up to the mark drop by drop, and rinsing a pH electrode between readings.

The 90° nozzle lets the jet reach the inside walls of a flask or the edge of a filter funnel without tipping the bottle, and a gentle squeeze gives a thin stream while a firmer one gives a stronger jet. Keep one labelled bottle for each liquid, such as distilled water or ethanol, so that rinses are never contaminated, and screw the cap tight when a volatile solvent is stored in it. Check chemical compatibility with us before filling it with strong solvents.

What to Specify When Ordering

- The number of bottles, for example one per bench for each rinse liquid.
- The liquids to be dispensed, so that chemical compatibility can be confirmed.
- Whether you need the bottle alone or a tray or set, since the name mentions trays but the listing describes the bottle only.
