# Description :

**Algebra** (Product Code: SLE/MAT/04) is a bingo-style classroom game used to practise and check algebra skills in middle and secondary school maths. Students work through 50 separate algebra questions and may mark their bingo cards only when they solve a question correctly, and the pack contains enough materials for 30 students. The game is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for school maths labs that want a lively wayto test algebra.

| Materials | Enough for 30 students |
| Aim | Tests students' algebra skills in a fun, creative and engaging way |
| Product code | SLE/MAT/04 |
| Supplied by | Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India |

## What Is the Algebra Bingo Game Used For?

Algebra practice often means rows of similar exercises; turning the same skills into a race for a full bingo line keeps students solving question after question with real attention. Since only a correct answer lets a student mark the card, every question becomes a quick self-check, and mistakes show up straight away rather than at marking time.

Give each student rough paper for working, or let pairs share a card so stronger students explain steps to classmates who need support. Short rounds make a good lesson starter, while playing all 50 questions suits a revision period. Afterwards, go back to the questions that caused most errors and model the method on the board. Physical resources such as algebra tiles or a maths balance help students who still need to see what an equation means.

## Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies this algebra game to schools, coaching centres and dealers as part of its maths lab catalogue, and it can be quoted together with other classroom resources in one order. For vendor registration, the supplying company's details are GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. Find out more on the ScienceLab company profile.
