Description :

Bottom Flat Pot (Balloons With Flat Bottom) 100 ml (Product Code: SCI-670/076) is a 100 ml flat bottom flask of borosilicate glass used to hold, mix and gently heat small volumes of liquid on a laboratory bench. Unlike a round bottom flask, its flat base stands upright without support, and the long neck accepts a stopper for simple gas-preparation or storage set-ups in schoolchemistry. **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, makesthis flask at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Flat bottom flask
Capacity	100 ml
Material	Borosilicate glass
Base	Flat
Neck	Long
Colour	Transparent
Properties	Chemical resistant, heat resistant
Product code	SCI-670/076
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 100 ml Flat Bottom Flask Used For?

As a basic item of chemistry lab equipment for schools in India, the 100 ml flat bottom flask is used to prepare small batches of solution, warm liquids over a spirit lamp or burner, demonstrate gas generation with a stoppered delivery tube, and keep samples covered on the bench between steps of an experiment.

Heat flat-bottomed glassware gently and evenly, because a flat base is less suited than a rounded one to strong or prolonged heating. Always place a wire gauze or ceramic mesh between the flame and the glass.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), the OEM (original equipment manufacturer) of this flat bottom flask. Production takes place at the company's own licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala, Haryana (Factory Licence AMB-ONLINE-CHD-J-414).

The flask is supplied factory-direct to schools, colleges, dealers and importers, and replacement flasks
