Description :

Bottom flat pot (Balloons with flat bottom) 500 ml (Product Code: SCI-672/078) is a 500 mlflat bottom flask in borosilicate glass used to prepare and hold larger volumes of solutions,distilled water and reagents on the laboratory bench. Technicians preparing class reagents relyon it because the flat base stands securely when full and the long neck limits splashing duringswirling. The flask is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEMmanufacturer of school lab glassware, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Flat bottom flask
Capacity	500 ml
Material	Borosilicate glass
Base	Flat
Neck	Long
Colour	Transparent
Properties	Chemical resistant, heat resistant
Product code	SCI-672/078
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 500 ml Flat Bottom Flask Used For?

Within school chemistry lab equipment in India, the 500 ml flat bottom flask is mainly a preparation and holding vessel: making up stock solutions before they are shared among student groups, boiling larger quantities of water, dissolving salts for crystallisation work, and keeping prepared liquids stoppered during a practical session.

It can also act as the boiling vessel for simple distillation or gas-generation demonstrations in front of the whole class. Label the flask with its contents and date, and warm it gradually on a hot plate or over gauze rather than in a direct flame.

OEM Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, is the OEM (original equipment manufacturer) of this 500 ml flat bottom flask and makes it at its own licensed factory at Saha, Ambala, Haryana, India. Schools, institutions, dealers and importers are supplied factory-direct, without a trading layer in between.

If a flask breaks or you need the same item next term, the manufacturer handles replacements and r
