Description :

Dropping Bottle (Product Code: SLE/P/15) is a 125 ml plain round LDPE bottle used to storeand dispense bench reagents and indicator solutions in school and college chemistrylaboratories. Made in natural LDPE and supplied with a cap, it is a lightweight container for thereagent sets used in salt analysis at school level. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Bottle style	Plain round
Capacity	125 ml
Material	LDPE, natural colour
Closure	Supplied with cap
Product code	SLE/P/15
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 125 ml Dropping Bottle Used For?

Chemistry teachers fill these bottles with bench reagents such as dilute acids, alkalis, indicators and test solutions, so that every practical station has its own labelled supply. The 125 ml size holds enough for reagents that are used again and again through a lesson, which cuts down trips to the stock cupboard. They are a basic item on the checklist for a new school lab setup in India.

Label each bottle with the reagent name and concentration, and keep caps on between uses to prevent evaporation and cross-contamination. Natural LDPE lets light through, so keep light-sensitive solutions such as silver nitrate in amber glass instead. Rinse the bottle with distilled water before refilling it with a different reagent.

OEM Manufacturer

The Dropping Bottle is manufactured by Jain Scientific Equipments Private Limited, which trades as ScienceLab and acts as OEM (original equipment manufacturer) at its own licensed factory at Saha, Ambala, Haryana, India. Schools, colleges, dealers and importers order these bottles factory-direct, and quotations are issued by the manufacturer rather than a reseller. Ask us about repeat orders or matching caps. See the ScienceLab company profile for more about the business.
