# Description :

**Marked (tarred) Pots 500 ml** (Product Code: SCI-640/089) is a graduated borosilicate glass pot used to prepare and hold larger batches of solutions or samples in school, college and training laboratories. At 500 ml it carries enough stock solution for a full class or several practical sessions, with clear glass for visibility and a corrugated cap to cover the contents. It is laboratory glassware made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

## Specifications

| Parameter | Detail |
|---|---|
| Capacity | 500 ml |
| Material | Borosilicate glass |
| Graduations | Yes (graduated) |
| Colour | Clear |
| Cap | Corrugated cap |
| Heat resistance | Heat resistant |
| Chemical resistance | Chemical resistant |
| Product code | SCI-640/089 |
| Manufacturer | Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM |
| Country of origin | India (made in Ambala, Haryana) |

## What Is the 500 ml Marked Pot Used For?

The 500 ml size is chosen when one batch has to serve a whole class. A lab assistant can weigh the solute into the tared pot, dissolve it and bring the level to the graduation needed before the lesson begins. It is equally handy for collecting water samples in environmental practicals, where the graduations give a rough volume record at the point of collection.

A full 500 ml pot is much heavier than the smaller sizes, so confirm that your balance's maximum load covers the pot plus its contents before weighing by difference, and support the base when carrying it. Chemical resistance suits most routine reagents, and heat resistance tolerates warm solutions, but keep the cap off until the contents have cooled.

## What to Specify When Ordering

- Capacity: 500 ml under code SCI-640/089; smaller and larger marked pots are separate listings.
- Number of pots: labs often keep one pot per stock reagent, plus spares.
- Other items: any measuring cylinders or beakers you want quoted in the same order.
