Product Name :

Glass Bottle, with Droppers colored

Product Code :

SCI-623/097

Image not found or type unknown

Description :

Glass Bottle, with Droppers colored (Product Code: SCI-623/097) is a 60 ml coloured glass dropping bottle used to hold and dispense light-sensitive indicators, stains and reagents a drop at a time in teaching laboratories. The tinted glass helps reduce the light reaching the solution, so it suits reagents usually kept in dark bottles, such as iodine or silver nitrate solutions. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Material	Glass bottle
Colour	Coloured
Dispensing	With droppers
Capacity	60 ml
Chemical resistance	Chemical resistant
Heat resistance	Heat resistant
Product code	SCI-623/097
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Coloured Dropper Bottle Used For?

Biology and chemistry benches often need small working amounts of reagents that deteriorate in light, such as iodine solution for starch tests or silver nitrate for halide tests. Keeping them in this coloured 60 ml dropping bottle lets students dispense a drop or two while the main stock stays protected in a cupboard. It is a small but useful part of school biology lab equipment as well as chemistry sets.

Because the glass is tinted, the liquid level is harder to see, so hold the bottle up to a window or lamp when checking how much is left. Label each bottle clearly, since coloured bottles look alike on a crowded bench, and still store them out of direct sunlight.

What to Specify When Ordering

- Colour: coloured (this listing, SCI-623/097) or colourless for general reagents.
- Capacity: 60 ml.
- Quantity: one bottle for each light-sensitive reagent on each bench.

OEM Manufacturer

The Glass Bottle, with Droppers colored comes from Jain Scientific Equipments Private Limited, which
