Description :

Glass Pipes of Different Diameters, length 100mm (Product Code: SCI-154/047) are straight, open glass tubes used to connect apparatus, carry gases and liquids between vessels and build simple set-ups in school and college laboratories. Each piece is 100 mm long, and the listing covers six diameters (6, 7, 8, 9, 11 and 13 mm), so a lab can match tubes to its stoppers and rubber tubing. They are made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Item	Straight glass pipes (tubes)
Length	100 mm
Diameters	6 mm, 7 mm, 8 mm, 9 mm, 11 mm, 13 mm
Material	Glass
Chemical resistance	Chemical resistant
Product code	SCI-154/047
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Are the 100 mm Glass Pipes Used For?

Short glass pipes are the connectors of the chemistry bench. Passed through a bored rubber stopper, a pipe becomes a gas outlet from a flask or test tube; joined with rubber tubing, it links a gas generator to a collecting jar or a delivery tube to a trough of water. Wider diameters let gas flow more freely, while narrower ones fit smaller stopper holes and give a finer stream when used as a simple jet.

Before inserting a pipe into a stopper, check that the ends are smooth, wet the glass with water or a little glycerol, protect your hand with a cloth and twist the pipe in gently rather than pushing straight. Keeping a mix of diameters on hand saves time when assembling gas collection apparatus in school labs in India.

What to Specify When Ordering

- Diameters — state which of the 6, 7, 8, 9, 11 and 13 mm sizes you need.
- Quantity per diameter — for example, how many of each size per bench or per lab.
- Matching stoppers and tubing — so the bore sizes fit the pipes you choose.
- Delivery location — for a quotation that includes dispatch.

OEM Manufacturer

Jain Scientific Equipments Private Limited, known to customers as ScienceLab, is the OEM of these
