Product Name :

T-Square

Product Code :

SLE/MAT/08

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

T-Square (Product Code: SLE/MAT/08) is a T-shaped straightedge used to draw horizontal and parallel lines, and to guide set squares for perpendicular lines, in maths, geometry and technical drawing lessons. Students and teachers slide its head along the edge of a drawing board or table so every line stays square to that edge. The T-Square is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its maths lab range of educational laboratoryequipment in India.

Key Details

Parameter	Detail
Type	T-shaped straightedge (head and blade)
Purpose	Drawing horizontal and parallel lines; guiding set squares
Size and material	Not stated in the current listing — confirm when you enquire
Product code	SLE/MAT/08
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the T-Square Used For?

Hold the short head firmly against the left edge of the board and the long blade gives a true horizontal line. Sliding the head down the edge produces a set of parallel lines, which is the basis of graph layouts, borders and geometric constructions. Resting a set square on the blade then gives vertical lines and the standard set-square angles without measuring each one with a protractor.

For accurate work, keep the head pressed to the edge while drawing, hold the blade flat and draw along its top edge. Check the blade now and then against a known straight edge, and store the T-Square flat or hanging so it stays straight. It is a useful addition to maths lab equipment for geometry construction and early technical drawing.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the T-Square to schools, colleges and dealers together with its wider range of maths lab items. Because the current listing does not give the size or material, we confirm those details in each quotation so buyers know exactly what they are ordering. Company information is on the ScienceLab profile page.
