Description :

Glass Bottle, for Liquid Reagents wide mouth (Product Code: SCI-265/101) is a small 60 ml glass bottle with a wide mouth and corrugated cap, used to hold and dispense liquid reagents at the student bench in school and college laboratories. The wide opening makes filling andcleaning easy, and the glass is listed as heat resistant. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of chemistry lab equipment for schools in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Capacity	60 ml
Material	Glass
Mouth	Wide mouth
Closure	Corrugated cap
Glass colour	Listed as coloured — confirm the shade with us when ordering
Properties	Heat resistant
Intended contents	Liquid reagents
Product code	SCI-265/101
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 60 ml Wide-Mouth Reagent Bottle Used For?

In practical classes each group usually works from its own small set of reagents. A 60 ml bottle holds enough dilute solution for a session without drawing down the main stock, and several bottles fit side by side on a bench shelf or tray. The wide neck lets a lab assistant refill it quickly through a funnel and lets a dropper or pipette reach the liquid easily.

Mark each bottle with the reagent name and concentration, close the cap straight after use and never return unused reagent to the bottle. When a reagent set is changed, wash the bottles with a brush, rinse with distilled water and let them dry upside down before refilling.

What to Specify When Ordering

- The bottle type: this listing is the 60 ml wide-mouth version; narrow-mouth and dropper bottles are separate items.
- Your preferred glass colour, since the listing states coloured glass without naming the shade.
- The number of bottles per reagent set and the number of sets per laboratory.
