Description :

Calculator Simple/Hand (Product Code: SLE/MAT/11) is a pocket-size basic calculator used for everyday addition, subtraction, multiplication and division in primary and middle-school maths, money activities and simple lab calculations. It has a standard 10-digit display, runs on solar power with battery backup and switches itself off automatically. The calculator is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as educational laboratory equipment in India for school maths labs and classrooms.

Specifications

Parameter	Detail
Type	Basic/standard calculator for basic operations
Size	Pocket size
Display	10-digit
Power	Solar power with battery backup
Power saving	Auto shut-off
Product code	SLE/MAT/11
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Simple Hand Calculator Used For?

A basic calculator is most valuable when students already understand the method and need to check their answers. Ask pupils to estimate first, work the sum on paper, then confirm on the calculator; a large gap between estimate and result points to a slip in place value. In shop and money role-play, it helps pupils total bills and work out change quickly.

In science practicals the same calculator speeds up averaging repeated readings. Because it uses solar power with battery backup, it keeps working in dimmer classrooms, and the auto shut-off saves power when it is left on a bench. Keep the solar panel clean and store the calculators together in a box so a full class set is ready for the next school lab session.

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab, supplies the Calculator Simple/Hand to schools, coaching centres and dealers along with its other maths lab items. For vendor registration, the supplying company's GSTIN is 06AAECJ8618A1ZT, and export orders are shipped under Importer-Exporter Code AAECJ8618A (DGFT). More about the company is on the ScienceLab profile page.
