Description :

Guide to Security Measures (Product Code: SCI-379/156) is a laminated wall chart used to set out the safety (security) measures students must follow before and during practical work in school science laboratories. Laboratory in-charges hang it where every class passes it, so the same precautions are reinforced each time students enter the room. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Subject	Laboratory security (safety) measures
Installation	Wall mounted
Finish	Laminated
Where used	Classrooms and laboratories
Dimensions	Not given in this listing — confirmed on request
Product code	SCI-379/156
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Security Measures Chart Used For?

A guide of this kind turns a laboratory's precautions into one reference that stays on the wall. Typical measures in a school laboratory include wearing eye protection and a lab coat, tying back long hair, never tasting chemicals or smelling them directly, keeping flammable liquids away from flames, knowing where the fire extinguisher, first-aid box and eye-wash are, and reporting every spill or breakage at once.

Teachers use the chart in the first practical of the year to walk new students through these precautions, and again whenever a new hazard — a burner, a corrosive reagent or glassware being heated — is introduced. Keeping real safety goggles for school students and a clearly marked first-aid box next to it makes the guidance concrete rather than theoretical.

OEM Manufacturer

ScienceLab is the brand of Jain Scientific Equipments Private Limited, the original equipment manufacturer of the Guide to Security Measures chart. The company (CIN U29309HR2020PTC087597) makes it at its licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala, Haryana, which operates under Factory Licence AMB-ONLINE-CHD-J-414. Schools that buy from the maker can come back to the same source for fresh copies when a chart becomes worn — just ask us. More about the company is on its profile page.
