Description :

Signs of Danger Chemicals (Product Code: SCI-381/157) is a 70 cm x 100 cm wall chart usedto teach the hazard warning signs found on chemical containers in school and collegelaboratories. Its laminated surface suits a position close to the reagent store, where studentscheck a label before they open a bottle. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Subject	Danger (hazard) signs for chemicals
Size	70 cm x 100 cm
Finish	Laminated
Installation	Wall mounted
Used in	Classrooms and laboratories
Product code	SCI-381/157
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Hazard Signs Chart Used For?

Hazard pictograms are a visual language. A flame warns of flammability, a skull and crossbones of acute toxicity, a corroded hand and surface of corrosive substances, an exploding bomb of explosives, a flame over a circle of oxidisers, and a dead tree and fish of harm to aquatic life. Students who can read these signs at a glance handle reagents more carefully and choose the right protection without being told.

In a practical class the chart doubles as a quick quiz: the teacher holds up a reagent bottle and asks which sign applies and what precaution follows. It also supports lessons on chemical storage, showing why oxidisers and flammables are kept apart. Together with hazard warning tape and protective clothing, it belongs with the basic chemistry lab equipment of any teaching laboratory.

What to Specify When Ordering

- The product code SCI-381/157 — a separate listing, Signs of Danger of Chemicals, covers the same subject.
- The number of copies, for example one for the laboratory and one for the chemical store.
- Whether the signs must follow a particular labelling system or language — we confirm the artwork before dispatch.
