Description :

Coordinate Board (Product Code: SLE/MAT/13) is a board game used to teach plotting and naming points on a four-quadrant graph in school mathematics classes. Played in groups with colour counters and dice, it turns a routine coordinate-geometry exercise into an engaging team activity. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM school lab equipment manufacturer, at its own factory in Ambala, India.

Key Details

Parameter	Detail
Graph type	Four-quadrant coordinate graph
Supplied with	Colour counters and dice
Topic	Plotting coordinates and naming their points
Format	Group board game
Product code	SLE/MAT/13
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Coordinate Board Used For?

Plotting and naming points on a four-quadrant graph is one of the most common tasks in a maths class, and the Coordinate Board makes it a game. Teachers can use the dice to generate ordered pairs; each player locates the point, marks it with a colour counter and names it aloud, while the group checks that the horizontal value was read first.

Because all four quadrants are on the board, students meet negative coordinates and the sign pattern of each quadrant early, not as an afterthought. It works well as a warm-up before written graph exercises and as a revision game within mathematics lab kits in India for middle classes.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the OEM that makes the Coordinate Board at its own licensed factory at Saha, Ambala, Haryana. Institutions, dealers and importers order it factory-direct, and repeat orders or extra counters are handled by the manufacturer itself — just ask us.

Institutions registering us as a vendor can use GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. Read the company profile for more background.
