Description :

Doctrine (Product Code: SCI-479/204) is a laboratory chemical of analytical reagent grade used for preparations and practical work in school, college and research laboratories. It is packed as a 100 g quantity with its MSDS, and buyers should confirm the exact chemical name and gradetheir method needs when they enquire. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its chemistry consumables range.

Specifications

Parameter	Detail
Grade	Analytical reagent
Quantity per pack	100 g
MSDS	Supplied with the pack
Shelf life	Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted.
Product code	SCI-479/204
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is Doctrine Used For?

The application of Doctrine depends on the exact substance your syllabus or test method calls for, because chemical catalogue names differ between suppliers and languages. Before ordering, check the chemical name, formula or CAS number given in your practical manual and quote it in your enquiry, so we can confirm that this 100 g analytical reagent pack matches what the experiment requires.

Once it arrives, handle it like any analytical reagent: take portions with a clean, dry spatula onto a weighing boat, never return unused material to the pack, and re-close the container straight away to keep out moisture and dust. Store it in a labelled chemistry reagent cabinet according to the hazard information in the MSDS.

Supplier

ScienceLab is the trading name of **Jain Scientific Equipments Private Limited**, an Ambala-based company that supplies analytical reagents such as Doctrine to teaching and research laboratories in India and international markets. For vendor registration, the supplying company's details are GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. More about the company is on the ScienceLab profile page.
