Product Name :

Burette Clamp - Single

Product Code :

SLE/P/27

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Burette Clamp - Single (Product Code: SLE/P/27) is a polypropylene clamp used to fix a burette to a stand rod for titration experiments in school, college and university chemistry labs. Its polypropylene body suits benches where acid and alkali solutions are handled, it fits rods from 10 to 14 mm in diameter, and rubber grips hold the burette steady. **Jain Scientific Equipments Pvt Ltd (ScienceLab)** makes this burette clamp as an OEM manufacturer and laboratory equipment supplier in India at its own factory in Ambala.

Specifications

Parameter	Detail
Material	Polypropylene
Rod diameter	10 to 14 mm
Grip	Rubber grips to prevent slipping
Version	Single (a double version is listed separately)
Product code	SLE/P/27
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Single Burette Clamp Used For?

In an acid–base or redox titration the burette must stay perfectly still while the student opens the stopcock drop by drop and watches for the end point. The single clamp grips the burette on a retort stand rod so both hands are free, one for the stopcock and one to swirl the flask. Because the body is plastic, drips of acid or alkali from the burette tip will not rust it the way they can attack a plain steel clamp.

Fix the clamp at a height where the zero mark is close to eye level, check that the burette hangs vertical, and wipe any spills from the grips after the practical. For individual student stations the single type is the natural choice, with the double clamp kept for stands that two students share.

What to Specify When Ordering

- Stand rod diameter (the clamp is listed for 10 to 14 mm rods).
- Single or double version, and how many of each.
- Whether retort stands or burettes should be included in the same quotation.

OEM Manufacturer

Jain Scientific Equipments Private Limited trades as ScienceLab and is the OEM for the Burette Clamp - Single. It produces the clamp at its own licensed factory in Saha, Ambala, Haryana, alongside the double version, so a lab can source matching single and double clamps from the same maker in one order. Quotations are prepared by the manufacturer, not a reseller. Learn more
