**Product Name :**

Communication Vessel Apparatus

**Product Code :**

SCL-371/015

## Description :

### DESCRIPTION :-

- Mounted on a wooden base with dimensions (230 x 100 x 22 mm), the total height is 160 mm
- Communicating vessels is a system of containers that communicate with each other below the liquid level.
- The containers will keep the same liquid level.
- If additional liquid is added to one container a new equal level will be established in all the connected containers.
- The communicating vessel demonstrates that containers with the same liquid and equal pressure on the liquid surface has the same liquid level.
