Description :

Draining Rack (Product Code: SCI-1202/01) is a free-standing bench unit with pegs used todrain and air-dry test tubes, beakers, flasks and other glassware after washing in school, collegeand research laboratories. Made of steel with a polyethylene coating, it has a tray hole and awater outlet hose at the bottom that carry dripping water away instead of letting it spread acrossthe bench. The rack is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer and laboratory equipment supplier in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Purpose	Drying test tubes, beakers, flasks, glassware and other laboratory supplies
Construction	Steel with polyethylene coating
Holding	Pegs
Drainage	Tray hole and water outlet hose at the bottom
Installation	Free-standing bench unit
Dimensions (as listed)	Length 80 mm x 600 mm — exact size confirmed in the quotation
Product code	SCI-1202/01
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Draining Rack Used For?

After washing, glassware is hung mouth-down on the pegs so that water runs out of it by gravity while air circulates around each item. This lets containers dry faster and be ready for the next practical without being wiped with cloths that could leave fibres behind. The tray hole and outlet hose collect the drips and lead them away, which helps keep the bench and floor dry around a busy washing area.

For a tidy routine, shake off excess water before hanging each item, give a final rinse with distilled water where spotting matters, and direct the outlet hose into a sink or container. The polyethylene coating can be wiped clean with a damp cloth; avoid scraping it with sharp tools. It is a straightforward piece of chemistry lab equipment for school and college washing stations.

What to Specify When Ordering

- The exact rack size you need, since the listed dimension (80 mm x 600 mm) should be confirmed in the quotation.
- Number of racks for your washing areas or laboratories.
- Where the outlet hose will discharge, such as into a sink, so the set-up suits your bench.
