Description :

Stethescope (Product Code: SCL1411/04) is an acoustic stethoscope used for auscultation — listening to the internal sounds of the human or animal body — in biology, physiology and health-education lessons. A small disc-shaped resonator placed against the chest carries sound through two tubes to the earpieces, so students can hear heart and lung sounds, the intestines and blood flow in arteries and veins. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Type	Acoustic stethoscope
Function	Auscultation: listening to the internal sounds of a human or animal body
Chest piece	Small disc-shaped resonator placed against the chest
Tubing	Two tubes connected to earpieces
Common uses	Heart and lung sounds; intestinal sounds; blood flow in arteries and veins
Used with	A sphygmomanometer, for measuring blood pressure
Product code	SCL1411/04
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Stethoscope Used For?

In class, students tilt the earpieces slightly forward so they follow the ear canals, then press the resonator gently but firmly onto the skin. Typical exercises are counting the heart rate before and after exercise, recognising the two-part sound of the heart valves closing, comparing breath sounds at different points on the chest and back, and listening over the abdomen for intestinal sounds. As biology teaching aids go, few make the working body as immediate for students.

With a sphygmomanometer cuff, the resonator is placed over the artery on the inside of the elbow to hear the sounds that mark systolic and diastolic pressure as the cuff deflates, the classic manual method of taking blood pressure. When one instrument is shared by a group, wipe the earpieces and resonator with an alcohol swab between users and store the tubing without sharp kinks.

Supplier

This stethoscope is supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, and equips schools, colleges, training institutes and dealers in India and international markets with biology and physiology teaching material. It can be quoted on its own or together with blood pressure and anatomy items. Learn more on the company profile .
