Description :

Plain Slides (Product Code: SCL1462/022) are flat, clear glass microscope slides measuring 75x 25 mm and 1.2 mm thick, used to carry temporary mounts, smears and stained sections for viewing under a compound microscope. Their ground edges make them safer for students to handle and clean, and the chemical-resistant glass takes routine stains. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a biology lab equipment supplier in India, to schools building a microscope slides set for practicals.

Specifications

Parameter	Detail
Dimensions	75 x 25 mm
Thickness	1.2 mm
Material	Glass
Shape	Rectangular
Edge	Ground edge
Colour	Clear
Property	Chemical resistant
Product code	SCL1462/022
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Plain Microscope Slides Used For?

Plain slides carry onion-peel and cheek-cell preparations, leaf epidermal peels that show stomata, thin hand-cut sections of stem and root, and blood or bacterial smears. The chemical-resistant glass is unaffected by stains such as safranin, methylene blue and iodine, or by the alcohol used for cleaning and fixing, which makes them the basic consumable in any temporary slides biology kit.

Wipe each slide with alcohol before making a smear so the film spreads evenly, hold slides by their ground edges, and label one end with a marker so that preparations are not mixed up. The 75 x 25 mm format sits securely under the stage clips of common school and college microscopes.

Supplier

These slides are supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, and serves schools, colleges, laboratories and dealers in India and international markets. Slides can be combined with coverslips, stains and storage boxes in a single quotation. Visit the company profile for more about ScienceLab.
