Product Name :

Watch Glass

Product Code :

“SCL241/039”

Image not found or type unknown

Description :

Watch Glass (Product Code: SCL241/039) is a shallow, curved disc of clear borosilicate glass used to hold, stain, weigh or evaporate small quantities of material in school and college laboratories. Biology students rely on it when staining plant sections, and its 3-inch diameter, heat resistance and chemical resistance suit both stains and gentle warming. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of botany and biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Diameter	3 inches
Material	Borosilicate glass
Colour	Clear
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Product code	SCL241/039
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Watch Glass Used For?

The most familiar biology use of a watch glass is staining thin transverse sections of stems, roots and leaves. Freshly cut sections are floated in water in one watch glass, moved to a second containing a stain such as safranine, rinsed in a third, and then lifted onto a slide in a drop of glycerine. Working along a row of watch glasses keeps each step separate and is the usual routine for temporary slides in biology practicals.

Chemistry and general science classes use the same glass to evaporate a few drops of solution and watch crystals form, to hold a small amount of powder on a balance pan, or to rest over the mouth of a small beaker to keep dust out. Because the glass is clear, a sheet of white paper underneath shows colour changes and residues well. Like any borosilicate laboratory glassware in India, it is best handled by the edges and set on a flat surface, since the curved base can slide on a wet bench.

OEM Manufacturer

Jain Scientific Equipments Private Limited (CIN U29309HR2020PTC087597), which trades as **ScienceLab**, is the OEM (original equipment manufacturer) of this watch glass and makes it at its own licensed factory at 449, HSIIDC Industrial Area, Saha, Ambala, Haryana, India (Factory Licence AMB-ONLINE-CHD-J-414). Schools, colleges, laboratories and dealers buy it straight from the maker rather than through a trader. For repeat orders or matching glassware for a new lab, s
